Introduction

Since fiscal year 2007, the Judicial Council of California has administered an opt-in survey to each California trial court to collect operational data on jury department performance. The survey captures metrics aligned with the National Center for Court Studies' (NCSC) 8th Trial Court Performance Measure on the Effective Use of Jurors. Courts use these metrics to streamline juror summons and qualification, and to increase the rate at which they seat juries from the available pool of jurors.

This report summarizes statewide jury metrics for the most recent reporting year and presents ten-year historical trends. It provides a comprehensive overview of jury summoning outcomes, juror availability, case type distributions, and the effectiveness of the jury selection pipeline across California's superior courts. The Judicial Council intends for these findings to support more efficient jury operations statewide and to better meet the demands of modern jury service.

Definitions

Jury Summoning Process

NEWLY SUMMONED. The total number of prospective jurors who received a summons to appear for jury duty, whether by mail, electronic service, or other means. This figure represents the initial pool of potential jurors contacted by trial courts.

POSTPONED IN. Prospective jurors from a prior-period who had postponed their service to the current period, and are hence summoned for service in the current period in lieu of their prior-period obligation.

TOTAL SUMMONED. The total amount of jurors summoned for jury duty in the current period; the summation of Newly Summoned and Postponed In.

QUALIFIED AND AVAILABLE. Prospective jurors who appear for jury duty, meet all statutory and court-imposed qualifications for service, and are available for potential jury selection. These individuals have passed initial screening and remain eligible for assignment to trials.

Reasons for Juror Unavailability

EXCUSED. Prospective jurors who are released from jury duty due to hardship or other compelling personal reasons. Excused jurors may be excused for a single trial or for an extended period.

DISQUALIFIED. Prospective jurors who do not meet the statutory requirements for jury service, including citizenship, language proficiency, or freedom from felony conviction.

DISMISSED. Prospective jurors who are removed from jury duty by judicial order, either due to peace officer involvement or death.

UNDELIVERED. Summonses that could not be delivered to the prospective juror due to incorrect address, inability to locate the individual, or refusal of service.

FAILURE TO APPEAR. Prospective jurors who received a valid summons but did not appear on their scheduled date without authorization.

POSTPONED OUT. Prospective jurors whose service is postponed to a future date after their initial scheduled appearance or who request postponement and are granted relief to a later period.

Jury Utilization and Selection

TOLD TO REPORT. The percentage of summoned prospective jurors who are instructed to physically appear for jury duty. Not all summoned jurors are called to report; many complete their service by simply waiting on-call or on stand-by.

SENT FOR SELECTION. The percentage of prospective jurors told to report who are actually sent to a courtroom for jury selection proceedings. Some may be released or dismissed prior to reaching the selection phase.

PANEL USED. The percentage of prospective jurors sent for selection who are ultimately assigned to a jury panel, either sworn or released during or after jury selection. This represents the final stage of the jury utilization pipeline.

Jury Trial Types and Designations

FELONY, MISDEMEANOR, CIVIL, AND OTHER. Case types distinguish the nature of the matter being tried. Felony cases involve serious criminal offenses; misdemeanor cases involve lesser criminal offenses; civil cases involve disputes between private parties or entities; and other cases include specialized proceedings.

ONE-DAY JURORS. Qualified and Available jurors who finish their service in one day, whether it be on call, on standby, or in person are considered one-day jurors. In-person designations indicate physical courtroom appearance, while teleconference designations indicate remote participation.

Jury Yield

Available, Unavailable and Jury Yield Trends

California statewide jury summons outcomes, FY2016–FY2025

Figure 1: Jury Yield Trends

Total summoned jurors have reached nearly 12 million each year since FY '23. Both available and unavailable jurors increased post-2020, while yield has remained stable. While the number of jurors summoned has increased, the percentage of those jurors who are qualified and available has not changed significantly, indicating that the increase in summons has not translated into a higher yield of usable jurors.

Unavailable Jurors by Subcategory

Figure 2: Unavailable Jurors by Subcategory

One useful way to assess how juror unavailability has shifted over time is to index each subcategory against its pre-pandemic baseline (2016–2019). This approach captures relative changes while accounting for fluctuations in the overall number of jurors summoned. Most unavailability categories have remained close to their pre-2020 averages over the past five years. The notable exception is Failure to Appear, which has risen roughly 30% above its pre-2020 baseline — suggesting a meaningful increase in the rate at which summoned jurors do not report for service.

Jury Utilization

Percentage of summoned jurors at each stage, California statewide

Figure 3: Jury Utilization Subcategories

Bar chart showing the percentage of summoned prospective jurors who progress through the jury utilization pipeline: told to report, sent for selection, and ultimately used in a panel. The trend shows that while Sent for Selection and Panel Used have remained relatively stable, the percentage of jurors Told to Report has notably decreased since pre-2020 levels, suggesting stickyness in covid practices around leaving jurors on standby or on-call rather than instructing them to report in person.

Statewide Distribution of Utilization Components

Figure 4: Distribution of Jury Yield Components

Box and whisker plot showing the distribution of three key measures across all California courts: told to report, sent for selection, and panel used. 50% of courts fall within each respective box, with the median indicated by the horizontal line. The plot illustrates that while the percentage of jurors told to report and those used in a panel are tightly clustered, jurors sent for selection varies widely across courts, suggesting that variation in jury yield across courts may be driven more by practices around selection than by practices around summoning or reporting.

Panel Distribution by Case Type

Bar chart showing the distribution of prospective jurors sent for selection by case type (felony, misdemeanor, civil, and other) in the most recent fiscal year.

Figure 5: Panel Distribution by Case Type

Panel Case Types — Historical Trend

Indexed line chart showing the trend in panel composition by case type from FY2021 baseline across the past five fiscal years.

Figure 6: Panel Case Types — Historical Trend

Sworn Jurors by Case Type

Bar chart showing the count of sworn jurors by case type (felony, misdemeanor, civil, and other) in the most recent fiscal year.

California statewide, FY25

Figure 7: Sworn Jurors by Case Type

Sworn Case Types — Historical Trend

Line chart showing the trend in sworn jurors by case type from FY 2016 across the past 10 fiscal years.

Figure 8: Sworn Case Types — Historical Trend

One-Day Jury Service by Modality

Bar chart showing the count of one-day jurors by modality (in-person and teleconference) in the most recent fiscal year.

Figure 9: One-Day Jury Service by Modality

One-Day Service Modality — Historical Trend

Line chart showing the trend in one-day jury service by modality from FY 2016 baseline across the past ten fiscal years.

Figure 10: One-Day Jury Service Modality

Tables

Table 1: Jury Yield Summary (2016–Present)

Summary of juror yield metrics for recent fiscal years.

Fiscal Year	Summoned	Postponed-In	Available	Unavailable	Yield %
FY '25	10,898,270	914,182	5,168,097	6,595,471	43.8
FY '24	10,687,217	862,315	5,201,478	6,348,054	45.0
FY '23	10,994,630	811,407	5,074,893	6,387,714	43.0
FY '22	9,889,604	741,388	5,001,376	5,629,616	47.0
FY '21	8,222,971	453,138	3,980,194	4,620,327	46.3
FY '20	8,140,486	735,814	4,803,482	4,072,818	54.1
FY '19	8,874,412	525,213	4,078,861	4,942,656	45.2
FY '18	8,831,301	551,074	4,050,135	4,894,952	44.8
FY '17	8,762,451	475,874	3,878,192	5,012,346	42.0
FY '16	7,541,675	437,174	3,178,589	4,459,101	39.8

Table 2: Unavailable Juror Subcategories

Fiscal Year	Excused	Disqualified	Dismissed	Undelivered	Failure to Appear	Postponed Out
FY '25	1,935,962	1,148,053	45,130	779,607	3,040,714	567,418
FY '24	1,912,490	1,157,103	45,065	800,365	2,783,106	512,240
FY '23	1,839,126	1,229,969	44,049	836,697	2,777,123	533,094
FY '22	1,712,393	1,138,038	43,070	794,486	2,088,790	594,227
FY '21	1,283,090	863,830	42,904	675,168	1,476,318	758,512
